Instruments	Indicative Allocation (% of total Assets)	
	Minimum	Maximum
Government Securities and T Bills	80%	100%
Other Debt Securities\$ and money market instruments	0%	20%

**Indicative Table:**(Actual instrument/percentages may vary subject to applicable SEBI circulars)

Sl. no	Type of Instrument	Percentage of exposure	Circular references
1.	Securitized Debt\$	The Scheme may invest up to 20% of the net assets in securitized debt	Paragraph 12.15 of SEBI Master Circular for Mutual Funds dated May 19, 2023.
2.	Overseas Investments	If the Scheme decides to invest in foreign debt securities, such investments will not exceed 20% of the net assets of the Scheme.	Paragraph 12.19 of SEBI Master Circular for Mutual Funds dated May 19, 2023.
3.	Derivatives	The scheme will invest in derivatives only for the purpose of hedging and portfolio balancing, and the exposure to derivatives shall be restricted to 50% of the net assets of the scheme	Paragraph 12.25 of SEBI Master Circular for Mutual Funds dated May 19, 2023.
4.	Repo/ reverse repo transactions in corporate debt securities	The Scheme may invest in repo of corporate debt securities .	Paragraph 12.18 of SEBI Master Circular for Mutual Funds dated May 19, 2023.
5.	Credit Default Swaps transactions	The scheme may invest in Credit Default Swaps in line with SEBI and RBI guidelines.	Paragraph 12.28 of SEBI Master Circular for Mutual Funds dated May 19, 2023.
6.	Securities lending and Borrowing	The scheme will not engage in scrip lending.	—
7.	Other/own mutual funds	The scheme may invest in the units of Mutual Fund Schemes. Such investment shall not exceed 5% of the net asset value of the Fund.	Clause 4 of Seventh Schedule of SEBI (Mutual Funds) Regulations, 1996.

The cumulative gross exposure through debt securities, Government Securities, money market instruments, derivative positions (including fixed income derivatives), repo transactions and credit default swaps in corporate debt securities and

such other securities/assets as may be permitted by the Board from time to time should not exceed 100% of the net assets of the scheme.

Pending deployment of funds of the Scheme in securities in terms of the investment objective of the Scheme the AMC may park the funds of the Scheme in short term deposits of scheduled commercial banks, subject to the guidelines specified in paragraph 12.16 of SEBI Master Circular for Mutual Funds dated May 19, 2023, as amended from time to time. The Scheme will comply with the following guidelines/restrictions for parking of funds in short term deposits:-

- a. "Short Term" for parking of funds shall be treated as a period not exceeding 91 days.
- b. Such short-term deposits shall be held in the name of the Scheme.
- c. The Scheme shall not park more than 15% of the net assets in short term deposit(s) of all the scheduled commercial banks put together. However, such limit may be raised to 20% with the approval of the Trustee.
- d. Parking of funds in short term deposits of associate and sponsor scheduled commercial banks together shall not exceed 20% of total deployment by the Mutual Fund in short term deposits.
- e. The Scheme shall not park more than 10% of the net assets in short term deposit(s), with any one scheduled commercial bank including its subsidiaries.
- f. The Scheme shall not park funds in short-term deposit of a bank which has invested in the said Scheme. Further Trustees/AMC shall also ensure that a bank in which scheme has short term deposit does not invest in the Scheme until the Scheme has short term deposits with such bank.
- g. AMC shall not charge any investment management and advisory fees for parking of funds in short term deposits of scheduled commercial banks.

However, the above provisions will not apply to term deposits placed as margins for trading in cash and derivatives market.

### **Overseas Investments by the Scheme**

According to paragraph 12.19 of SEBI Master Circular for Mutual Funds dated May 19, 2023 mutual funds can invest in ADRs/GDRs/other specified foreign securities.

As per paragraph 12.19.1 of SEBI Master Circular for Mutual Funds dated May 19, 2023 such investments are subject to an overall limit of US\$ 7 billion for all mutual funds put together.

The Mutual Funds have been allowed an individual limit of US\$ 1 billion for overseas investments. The Scheme may, with the approval of SEBI/ RBI invest in foreign securities as specified by SEBI. The overall ceiling for investment in overseas ETFs that invest in securities is US \$ 1 billion subject to a maximum of US \$ 300 million per mutual fund.

The AMC is allowed to invest in overseas securities up to 20% of the average Asset Under Management ('AUM') in overseas securities of the previous three calendar months subject to maximum limit of USD 1 billion per Mutual Fund. The above limits shall be considered as soft limits for the purpose of reporting only by Mutual Funds on monthly basis as per paragraph 12.19.1.3(d) of SEBI Master Circular for Mutual Funds dated May 19, 2023.

The Mutual Fund may, where necessary will appoint intermediaries as sub-managers, sub-custodians, etc. for managing and administering such investments. The appointment of such intermediaries shall be in accordance with the applicable requirements of SEBI and within the permissible ceilings of expenses.

### **Portfolio Rebalancing**

In accordance with paragraph 2.9 of SEBI Master Circular for Mutual Funds dated May 19, 2023, in case of deviation from the mandated asset allocation due to passive breaches (occurrence of instances not arising out of omission and commission of AMCs), the portfolio would be rebalanced within 30 business days from the date of deviation. Where the portfolio is not rebalanced within 30 business days, justification for the same shall be placed before the Investment Committee and reasons for

the same shall be recorded in writing. The Investment Committee, if so desires, can extend the timelines up to sixty (60) business days from the date of completion of mandated rebalancing period. However, at all times, the portfolio will adhere to the overall investment objective of the scheme.

In case the portfolio of schemes is not rebalanced within the aforementioned mandated plus extended timelines, AMCs shall:

- i. not be permitted to launch any new scheme till the time the portfolio is rebalanced.
- ii. not to levy exit load, if any, on the investors exiting such scheme(s)

**Short term defensive consideration:**

Due to market conditions, the AMC may invest beyond the range set out in the asset allocation. Such deviations shall normally be for a short term and defensive considerations in line with paragraph 1.14.1.2(b) of SEBI Master Circular for Mutual Funds dated May 19, 2023 and the fund manager will rebalance the portfolio within 30 calendar days from the date of deviation.

**B. WHERE WILL THE SCHEME INVEST?**

Subject to the Regulations and other prevailing laws as applicable, the corpus of the Scheme can be invested in any (but not exclusively) of the following securities:

1. Securities created and issued by the Central and State Governments and/or repos/reverse repos in such Government Securities as may be permitted by RBI (including but not limited to coupon bearing bonds, zero coupon bonds and treasury bills)

15. Any other instruments, as may be permitted by RBI / SEBI / such other Regulatory Authority, from time to time, subject to regulatory approval.

The securities mentioned above could be listed or permitted unlisted, privately placed, secured or unsecured, rated or un-rated and of any maturity, as enabled under SEBI Regulations/ circulars/ RBI. The securities may be acquired from primary market/ initial public offer, secondary market operations, private placement or negotiated deals.

### C. WHAT ARE THE INVESTMENT STRATEGIES?

The Fund Management team endeavors to meet the investment objective whilst maintaining a balance between liquidity and profitability of the investments. The scheme shall predominantly invest in government securities which shall provide income and capital appreciation and be deemed to have no credit risk. The scheme would mainly invest in securities issued/ backed by the Government of India and the State Governments. The Scheme shall be actively managed and the Fund Management team shall formulate an active view of the interest rate movements by monitoring various parameters of the Indian economy, as well as developments in global markets. The Scheme may try to leverage its international resource base to understand the global economic and interest rate environment. Investment views/ decisions inter alia may be taken on the basis of the following parameters:

1. Prevailing interest rate scenario
2. Returns offered relative to alternative investment opportunities.
3. Maturity profile of the instrument
4. Liquidity of the security
5. Any other factors considered relevant in the opinion of the Fund Management team.

The Scheme may also use derivatives to reduce the volatility of the portfolio and/or to enhance the portfolio returns. The Scheme may try to identify securities that yield relative value over others for similar risk and liquidity level. Various analytical tools like yield curve analysis, horizon returns, forward implied interest rates, may be deployed to evaluate various investment options. Investments in gilts carry various risks like interest rate risk, liquidity risk, reinvestment risk etc. Whilst these cannot be done away with, they may be minimized by diversification and effective use of hedging techniques.

**Liquidity Support from RBI-** Subject to the RBI Guidelines, PGIM India Gilt Fund (being a Scheme dedicated exclusively to investments in Government securities) may be eligible to avail on any day from RBI, liquidity support up to 20% of the outstanding value of its investments in Government securities (as at the close of business on the previous working day), under its Guidelines issued vide letter IDMC.No.2741/03.01.00/95-96 dated April 20, 1996. Liquidity support under these guidelines is available through reverse repurchase agreements in eligible Central Government dated securities and Treasury Bills of all maturities.

#### **Investment in Fixed Income Derivative Instruments:**

SEBI has vide its paragraph 12.28.1.4 of Master Circular on Mutual Funds dated May 19, 2023, permitted all mutual funds to participate in derivatives trading subject to observance of guidelines issued by SEBI in this behalf.

Pursuant to paragraph 7.5, 7.6 and 12.25 of SEBI Master Circular for Mutual Funds dated May 19, 2023 and such other circular issued by SEBI from time to time in this regard, the Scheme may use derivative instruments like Interest Rate Swaps, Forward Rate Agreements, stock future or other derivative instruments for the purpose of hedging and portfolio balancing or for its efficient management.

Derivative instruments offer unique advantages like security exposures without the attendant execution and settlement risk. Derivative instruments carry a high risk return ratio. It is like an insurance policy where one has to pay the premium up-front and the benefit is contingent upon an event. Derivative instrument if used on a leveraged basis could distort the risk return ratio considerably even with a small price movement (the scheme will not take a leveraged exposure). It requires a high level of knowledge, understanding and surveillance to control risk.

The Scheme may use derivative instruments primarily to protect the value of portfolio against potential risks such as interest rate risk, credit risks, reinvestment risk and liquidity risks. This protection is also known as hedge. At the same time, however, a properly correlated hedge will result in a gain in the portfolio position being offset by a loss in the hedge position. As a result, the use of derivatives could limit any potential gain from an increase in value of the position hedged. In addition, an exposure to derivatives in excess of the hedging requirement can lead to losses. IRS and FRAs do also have inherent credit and settlement risks. However, these risks are substantially reduced as they are limited to the interest streams and not the notional principal amounts.

Derivative instruments may take form of Interest rate swaps, Forward rate agreements and such other derivative instruments as may be available from time to time and appropriate for the portfolio. The Scheme, however, will use the derivative instruments very judiciously and keep in mind the overall objective the scheme.

For details of risk factors relating to use of Derivatives, the investors are advised to refer to Scheme Specific Risk Factors.

For further details regarding concepts and examples of derivatives that may be used by the fund manager, please refer to SAI.

### **Securitisation**

Asset securitisation is a process whereby commercial or consumer credits are packaged and sold in the form of financial instruments. A typical process of asset securitisation involves sale of specific Receivables to a Special Purpose Vehicle (SPV) set up in the form of a trust or a company. The SPV in turn issues financial instruments (e.g., promissory notes, pass through certificates or other debt instruments) to investors, such instruments evidencing the beneficial ownership of the investors in the Receivables. The financial instruments are rated by an independent credit rating agency. An Investor's Agent is normally appointed for providing trusteeship services for the transaction.

On the recommendation of the credit rating agency, additional credit support (Credit Enhancement) may be provided in order that the instrument may receive the desired level of rating. Typically the servicing of the Receivables is continued by the seller in the capacity of the Servicer. Cash flows, as and when they are received, are passed onto the investors.

### **Risk Control**

Since investing requires disciplined risk management, the AMC would incorporate adequate safeguards for controlling risks in the portfolio construction process.

The risk control process involves reducing risks through portfolio diversification, taking care however not to dilute returns in the process. The AMC believes that this diversification would help achieve the desired level of consistency in returns. Stock specific risk will be minimized by investing only in those companies that have been analyzed by the Investment Team at the AMC. For investments in debt securities, the AMC aims to identify securities, which offer superior levels of yield at lower levels of risks. With the aim of controlling risks, rigorous and in-depth credit evaluation of the securities proposed to be invested in, will be carried out by the investment team of the AMC. Rated Debt instruments in which the Scheme invests will be of investment grade as rated by a credit rating agency. The AMC will be guided but not limited by the ratings of Rating Agencies such as CRISIL, CARE, ICRA and Fitch or any other rating agencies that may be registered with SEBI from time to time. In case a debt instrument is not rated, investment will be in accordance with Guidelines approved by the Board. Further, all investments in the unrated paper are periodically reviewed by Investment Committee and the Board of AMC & Trustee Company.

The Scheme may also use various derivatives and hedging products from time to time, as would be available and permitted by SEBI, in an attempt to protect the value of the portfolio and enhance Unitholders' interest.

### **Portfolio Turnover**

Portfolio turnover is defined as the aggregate of purchases and sales as a percentage of the corpus of the Scheme during a specified period of time. Portfolio turnover in the Scheme will be a function of market opportunities. The economic environment changes on a continuous basis and exposes debt portfolio to systematic as well as nonsystematic risk. Consequently, it is difficult to estimate with any reasonable measure of accuracy, the likely turnover in the portfolio.

The Investment Manager will endeavor to optimise portfolio turnover to optimise risk adjusted return keeping in mind the cost associated with it. A high portfolio turnover rate is not necessarily a drag on portfolio performance and may be representative of

arbitrage opportunities that exist for scrip/securities held in the portfolio rather than an indication of a change in AMC's view on a scrip, etc.

#### **D. HOW WILL THE SCHEME BENCHMARK ITS PERFORMANCE?**

**Benchmark (Total Returns Index):** CRISIL Dynamic Gilt Index .

As required under clause 1.9 of Master Circular dated May 19, 2023, the benchmark has been selected from amongst those notified by AMFI as the first tier benchmark to be adopted by mutual funds and which are reflective of the category of the scheme.

CRISIL Dynamic Gilt Index tracks the performance of a portfolio comprising government securities, across maturities. The benchmark has been chosen on the basis of the investment strategy of the Scheme and the composition of the CRISIL Dynamic Gilt Index and is such that it is most suited for comparing performance of the scheme.

The Trustee/AMC reserves the right to change the benchmark for evaluating the performance of the Scheme from time to time, in conformity with the investment objective of the Scheme and the appropriateness of the benchmark, subject to SEBI guidelines and other prevalent guidelines.

### **Part III- OTHER DETAILS**

#### **A. COMPUTATION OF NAV**

NAV of Units under the Scheme will be calculated by following method:

NAV (Rs.) =	Market or Fair Value of Scheme's investments + Current Assets - Current Liabilities and Provisions
	No. of Units outstanding under the Scheme

- The NAV is rounded off upto 4 decimal places.
- Separate NAV will be calculated and disclosed for each Plan/Option.
- The AMC will calculate and disclose the NAV of the Scheme on all the Business Days.
- The valuation of the Scheme's assets and computation of the Scheme's NAV shall be subject to audit on an annual basis and such regulations as may be prescribed by SEBI from time to time.

**The numerical illustration of the above method is provided below:**

Market or Fair Value of Scheme's investment (Rs.) = 1,15,12,05,600.00

Current Assets (Rs.) = 60,00,000.00

Current Liabilities (Rs.) = 40,00,000.00

No of units Outstanding under the scheme = 10,00,00,000

$$\text{NAV Per Unit (Rs.)} = \frac{115,12,05,600 + 60,00,000 - 40,00,000}{10,00,00,000} = 11.5321$$

The aforesaid provision pertaining to " Calculation of NAV" shall apply in respect of each individual scheme and / or plan as the case may be. The NAV per unit above is rounded off to four decimals

The NAV will be calculated as of the close of every Business Day.

#### **Methodology for calculation of sale and re-purchase price of the units of mutual fund scheme:**

<b>Ongoing price for subscription (purchase)/ switch-in (from other Schemes of the Mutual Fund) by investors.</b>  This is the price you	At the applicable NAV.
	Ongoing Price for subscription = Applicable NAV*(1+ Entry Load, (if any)
	Example:
	If the Applicable NAV is Rs.10, Entry Load is nil then sales price will be

need to pay for purchase /switch-in.	= Rs. 10* (1+0) = Rs. 10
<b>Ongoing price for redemption (sale) /switch outs (to other schemes of the Mutual Fund) by investors.</b>  This is the price you will receive for redemptions/switch outs.	At the applicable NAV, subject to prevailing exit load.  Redemption Price = Applicable NAV*(1- Exit Load, (if any)  Example:  If the Applicable NAV is Rs.10, Exit Load is 1% then redemption price will be = Rs. 10* (1-0.01) = Rs. 9.90

The Redemption Price will not be lower than 95% of the NAV or as permitted / prescribed under the SEBI Regulations from time to time.

For other details such as policies w.r.t computation of NAV, rounding off, investment in foreign securities, procedure in case of delay in disclosure of NAV etc. Kindly refer SAI.

#### **B. NEW FUND OFFER (NFO) EXPENSES**

These expenses are incurred for the purpose of various activities related to the NFO like sales and distribution fees paid marketing and advertising, registrar expenses, printing and stationary, bank charges etc. All such expenses are borne by the AMC.

#### **C. ANNUAL SCHEME RECURRING EXPENSES**

These are the fees and expenses for operating the Scheme. These expenses include the Investment Management and Advisory Fee charged by the AMC, Registrar and Transfer Agents' Fee, marketing and selling costs etc. as given below:

The AMC has estimated that up to **2.00 %** of the daily net assets of the scheme will be charged to the scheme as expenses.

#### **Operating & recurring expenses under regulation 52 (6) & 52 (6A):**

- a) The total expense ratio that can be charged to the Scheme, excluding issue or redemption expenses, whether initially borne by the mutual fund or by the AMC, but including the investment management and advisory fee shall be as follows:

<b>Assets under management Slab</b>	<b>Total expense ratio limits (p.a.)</b>
on the first Rs.500 crores of the daily net assets	2.00%
on the next Rs.250 crores of the daily net assets	1.75%
on the next Rs.1,250 crores of the daily net assets	1.50%
on the next Rs.3,000 crores of the daily net assets	1.35%

on the next Rs.5,000 crores of the daily net assets	1.25%
On the next Rs.40,000 crores of the daily net assets	Total expense ratio reduction of 0.05% for every increase of Rs.5,000 crores of daily net assets or part thereof
On balance of the assets	0.80%

b) In addition to the annual recurring expenses stated in (a) above, the following costs or expenses may be charged to the Scheme:-

- i. Brokerage and transaction cost incurred for the purpose of execution shall be charged to the schemes as provided under Regulation 52 (6A) (a) upto 0.12 percent and 0.05 per cent for cash market transactions and derivatives transactions respectively. Any payment towards brokerage & transaction costs, over and above the said 0.12 per cent and 0.05 per cent for cash market transactions and derivatives transactions respectively may be charged to the Scheme within the maximum limit of Total Expense Ratio (TER) as prescribed under Regulation 52 of the SEBI (Mutual Funds) Regulations, 1996.
- ii. Additional Expenses not exceeding of 0.30 per cent of daily net assets of the schemes, if the new inflows from beyond top 30 cities (as per SEBI Regulations /Circulars/ AMFI data) are at least (i) 30 per cent of gross new inflows from retail investors\* in the scheme, or (ii) 15 per cent of the average assets under management (year to date) of the scheme, whichever is higher. Provided that if inflows from such cities is less than the higher of sub-clause (i) or sub-clause (ii), such expenses on daily net assets of the scheme shall be charged on proportionate basis. \

*\*Inflows of amount upto Rs 2,00,000/- per transaction, by individual investors shall be considered as in flows from "retail investors."*

The additional expenses charged under this clause shall be utilised for distribution expenses incurred for bringing inflows from such cities. Provided further that amount incurred as additional expense on account of inflows from such cities shall be credited back to the scheme in case the said inflows are redeemed within a period of one year from the date of investment.

**Note:** Pursuant to the directions received from SEBI vide its letter no. SEBI/HO/IMD-SEC-3/P/OW/2023/5823/1 dated February 24, 2023 read along with AMFI communication dated March 02, 2023, w.e.f March 01, 2023 no additional expense shall be charged on the new inflows received on or after March 01, 2023 from specified cities as per Regulation 52 (6A) (b) till any further guidance is received from SEBI in this regard.

- iii. Additional expenses not exceeding 0.05 per cent of daily net assets of the scheme, towards the investment and advisory fees or various other permissible expenses; (It may be noted that these expenses will not be charged in case the scheme does not charge an exit load)

Within such total recurring expenses charged to the Scheme as above, the investment management and advisory fee (charged as a percentage of daily net assets) would be as decided by the AMC from time to time, provided that the investment management and advisory fee shall not exceed the aggregate of expenses charged under clause (a) and (b) (iii) above.

In terms of paragraph 10.1.16 of SEBI Master Circular for Mutual Fund dated May 19, 2023, the AMC shall annually set apart at least 0.02% on daily net assets within the maximum limit of recurring expenses as per Regulation 52 for investor education and awareness initiatives.

The maximum annual recurring expenses of the Scheme including the investment management and advisory fee (together with additional management fee wherever applicable) shall not exceed the limit stated in Regulation 52 read with paragraph 10.1 of SEBI Master Circular for Mutual Fund dated May 19, 2023, as explained above.

**Goods and Services tax (GST):-**

- AMC may charge GST on investment and advisory fees of the Scheme in addition to the maximum limit of TER as per the Regulation 52(6) and (6A).
- GST on expenses other than investment and advisory fees: AMC may charge GST on expenses other than investment and advisory fees of the Scheme, if any within the maximum limit of TER as per the Regulation under 52(6) and (6A).
- GST on brokerage & transaction cost: GST on brokerage and transaction costs which are incurred for the purpose of execution of trade, will be within the limit of expenses as per the Regulation 52(6) and (6A). Further, the Goods and Services tax on exit load, if any, shall be paid out of the exit load proceeds and the exit load net of Goods and Services tax, if any, shall be credited back to the scheme.

All fees and expenses charged in the Direct Plan (in percentage terms) under various heads including the investment and advisory fee shall not exceed the fees and expenses charged under the Regular Plan. The Direct Plan under the Scheme shall have a lower expense ratio as compared to the Regular Plan. Commission/ Distribution expenses will not be charged in case of Direct Plan. The Direct Plan shall also have separate NAV. For the actual current expenses being charged, the investor may refer to the website of the Mutual Fund ([www.pgimindiamf.com](http://www.pgimindiamf.com)). Further, the disclosure of Total Expense Ratio (TER) on a daily basis shall also be made on the website of AMFI ([www.amfiindia.com](http://www.amfiindia.com)). The Mutual Fund would update the expense ratios on the website at least three business days prior to the effective date of the change. Additionally, TER is also available on website <https://www.pgimindiamf.com/statutory-disclosure/portfolio-related/expense-ratio>.

The AMC has estimated the following total expenses for the first Rs. 500 Crores of the daily net assets of the Scheme:-

Expense Head	% of daily Net Assets
Investment Management and Advisory Fees	Upto 2.00%
Trustee fee	
Audit fees	
Custodian fees

<b>Maximum total expense ratio (TER) permissible under Regulation 52 (6) (c)</b>	<b>Upto 2.00%</b>
Additional expenses under regulation 52 (6A) (c)s	Upto 0.05%**
Additional expenses for gross new inflows from beyond top 30 cities	Upto 0.30%

\*Any other expenses which are directly attributable to the Scheme, except those expenses which are specifically prohibited, may be charged with the approval of the Trustee within the overall limits specified in the SEBI (Mutual Funds) Regulations.

\*\* It may be noted that these expenses will not be charged in case the scheme does not charge an exit load.

The purpose of the above table is to assist the investor in understanding the various costs & expenses that an investor in the Scheme will bear directly or indirectly. The above expenses (including Investment Management and Advisory Fees) are subject to inter-se change and may increase/decrease as per actual and/or any change in the Regulations. All types of expenses charged to the Scheme shall be in accordance with the SEBI (MF) Regulations.

The entire exit load (net of Goods and services tax), charged, if any, shall be credited to the Scheme.

#### Illustration of impact of expense ratio on scheme's returns

Particulars	Regular Plan	Direct Plan
Amount Invested at the beginning of the year (in Rs.)	10,000.00	10,000.00
Returns after Brokerage and Transaction Cost but before other expenses and Investment Management and Advisory Fees (in Rs.)	1,000.00	1,000.00
Returns after Brokerage and Transaction Cost but before other expenses and Investment Management and Advisory Fees (%)	10.00%	10.00%
Distribution Expenses (in Rs.)	150.00	0.00
Expenses other than Distribution Expenses (in Rs.)	20.00	20.00
Investment Management and Advisory Fees (in Rs.)	60.00	60.00
Returns after Brokerage and Transaction Cost ,other expenses and Investment Management and Advisory Fees (in Rs.)	770.00	920.00

The present illustration is calculated pursuant to the requirements of paragraph 5.8.2.2 of SEBI Master Circular for Mutual Fund dated May 19, 2023. The purpose of an illustration is to purely explain the impact of expense ratio charged to the Scheme and should not be construed as providing any kind of investment advice or guarantee of returns on investments. Actual returns

on your investment may be more, or less. The expenses of the Direct Plan under the Scheme will be lower to the extent of distribution expenses/commission. The NAVs published by the AMC are net of scheme expenses and they reflect return on investment to investors, provided investment is not subject to exit load. Any tax impact has not been considered in the above example, in view of the individual nature of the tax implications. Each investor is advised to consult his or her own financial advisor.

#### **D. LOAD STRUCTURE**

Exit Load is an amount which is paid by the investor to redeem the units from the scheme. Load amounts are variable and are subject to change from time to time.

The load structure of the Scheme is as follows:

<b>Type of Load</b>	<b>Load chargeable (as % of NAV)</b>
Exit	NIL

The AMC/Trustee reserves the right to change / modify the Load structure of the Scheme, subject to maximum limits as prescribed under the Regulations.

#### **Exit Load for switches within the Scheme:**

- a) Where the investments were routed through a distributor (i.e. made with distributor code), any Switch of Units from the Regular Plan to Direct Plan of a Scheme shall be subject to applicable exit load, if any. However, any subsequent switch - out or redemption of such investments from the Direct Plan will not be subject to any exit load;
- b) Where investments were made directly i.e. without any distributor code, exit load will not be levied on switch of Units from Regular Plan to Direct Plan of that Scheme. However, any subsequent switch-out or redemption will be subject to exit load applicable from the original date of investment;
- c) No exit load shall be levied in case of switch of Units from Direct Plan to Regular Plan of a Scheme. However, any subsequent switch-out or redemption of such investment from the Regular Plan shall be subject to exit load based on the original date of investment in the Direct Plan.

#### **Load exemptions:**

AMC shall not charge any load on units allotted on reinvestment of IDCW for existing as well as prospective investors.

Any change in the load structure shall be applicable on prospective investments only. For any change in load structure, the AMC will issue an addendum and display it on its Website ([www.pgimindiamf.com](http://www.pgimindiamf.com)) and Investor Service Centers. The addendum will also be circulated to all the distributors / brokers, so that the same can be attached to all SIDs and Key Information Memorandum in stock till the same is updated and reprinted. The AMC would make arrangements to display the addendum to the SID in the form of a notice at all the Investor Service Centers. The change in the Exit Load would be disclosed in the statement of accounts issued after the introduction of such Load. Any other measures which the Mutual Fund may feel necessary would be undertaken.

The investors are requested to check the prevailing load structure of the Scheme before investing.

*For the current applicable exit load structure, please refer to the website of the AMC ([www.pgimindiamf.com](http://www.pgimindiamf.com)) or may call at 1800 266 7446 (toll free no.) or your distributor.*

## Section II

### **I. Introduction**

#### **A. Definitions/interpretation**

For detailed description please click the <https://www.pgimindiamf.com/statutory-disclosure/sid-kim-sai-related-disclosures>

#### **B. Risk factors**

##### **I. Standard Risk Factors:**

- Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal;
- As the price/value/interest rates of the securities in which the Scheme invests fluctuates, the value of your investment in the Scheme may go up or down;
- Past performance of the Sponsor/AMC/Mutual Fund does not guarantee future performance of the Scheme;
- The name of the Scheme does not in any manner indicate either the quality of the scheme or its future prospects and returns;
- Save as otherwise provided in the Regulations, the Sponsor is not responsible or liable for any loss resulting from the operation of the Scheme beyond the initial contribution of Rs.100,000/- made by it towards setting up the Fund;
- The present Scheme is not guaranteed or assured return schemes.

##### **II. Scheme specific risk factors**

Some of the Scheme specific risk factors include, but not limited, to the following:-

###### **1. Risk Factors Associated with Fixed Income and Money Market Instruments:**

- a) The Scheme may invest in debt and debt related instruments, as may be permitted by SEBI, from time to time. Trading volumes, settlement periods and transfer procedures may restrict the liquidity of these investments. Different segments of Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances. The inability of the Scheme to make intended securities' purchases due to settlement problems could cause the Scheme to miss certain investment opportunities. The length of time for settlement may affect the Scheme in the event the Scheme has to meet an exceptionally large number of redemption requests. The Scheme will retain certain investments in cash or cash equivalents for its day-to-day liquidity requirements.
- b) A fundamental risk relating to all fixed income securities is a chance that an issuer will fail to make a principal and interest payment when due (credit risk). Issuers with higher credit risks typically offer higher yields for this added risk. Conversely, issuers with lower credit risk offer lower credit yields. Generally government securities are considered to be the safest in terms of the credit risk. Changes in financial conditions of an issuer, changes in economic and political conditions in general, or changes in economic or and political conditions specific to an issuer, all of which are factors that may have an adverse impact on a firms credit quality and security values. While it is the intent of the Investment Manager to invest primarily in highly rated debt securities, the Schemes may from time to time invest in higher yielding, lower rated securities. This is likely to enhance the degree of credit risk. The Investment Manager will endeavour to manage credit risk through in-house credit analysis.
- c) All fixed income securities are also affected by changes in interest rates (interest rate risk). The prices of debt securities generally increase as interest rates decline and generally decrease as interest rates rise. Prices of long-term securities generally fluctuate more in response to interest rate changes than the short-term securities. The Debt markets can be volatile leading to the possibility of up or down movements in prices of fixed income securities and thus the possible

movements in the NAV. The Scheme may use various hedging products from time to time, as are available and permitted by SEBI, to attempt to reduce the impact of undue market volatility on the Scheme's portfolio.

- d) Debt securities may also be subject to price volatility due to factors such as market perception of the issuer and general market liquidity conditions (market risk).
- e) Lower rated or unrated securities are more likely to react to developments affecting the credit market than highly rated securities, which react primarily to movements in the general level of interest rates. Lower rated securities also tend to be more sensitive to economic conditions than higher rated securities. The Investment Manager will consider both credit risk and market risk in making investment decisions.
- f) The corporate debt market is relatively illiquid vis-à-vis the government securities market. Even though the government securities market is more liquid compared to that of other debt instruments, on occasions, there could be difficulties in transacting in the market due to extreme volatility or unusual constriction in market volumes or on occasions when an unusually large transaction has to be put through.
- g) Zero coupon or deep discount bonds are debt obligations that do not entitle the holder to any periodic payment of interest prior to maturity or a specified date when the securities begin paying current interest and therefore, are generally issued and traded at a discount to their face values. The discount depends on the time remaining until maturity or the date when securities begin paying current interest. It also varies depending on the prevailing interest rates, liquidity of the security and the perceived credit risk of the Issuer. The market prices of zero coupon securities are generally more volatile than the market prices of securities that pay interest periodically and are likely to respond to changes in interest rates to a greater degree than other coupon bearing securities having similar maturities and credit quality.
- h) Apart from normal credit risk, zero coupon bonds carry an additional risk, unlike bonds that pay interest throughout the period to maturity, zero coupon instruments/deferred interest bonds typically would not realise any cash until maturity or till the time interest payment on the bonds commences. If the issuer defaults, the Scheme may not obtain any return on its investment.
- i) The Scheme may invest in securities which are not quoted on a stock exchange ("unlisted securities") which in general are subject to greater price fluctuations, less liquidity and greater risk than those which are traded in the open market. Unlisted securities may lack a liquid secondary market, and there can be no assurance that the Scheme will realise its investments in unlisted securities at a fair market value, if sold in the secondary market
- j) There have been times in the past, when settlements have been unable to keep pace with the volume of securities transactions, making it difficult to conduct further transactions. Delays or other problems in settlement of transactions could result in temporary periods when the assets of the Scheme are not invested and no return is earned thereon.
- k) Prepayment Risk: Certain fixed income securities give an issuer the right to call back its securities before their maturity date, in periods of declining interest rates. The possibility of such prepayment may force the fund to reinvest the proceeds of such investments in securities offering lower yields, resulting in lower interest income for the fund.
- l) Reinvestment Risk: This risk refers to the interest rate levels at which cash flows received from the securities in the Plans are reinvested. The additional income from reinvestment is the "interest on interest" component. The risk is that the rate at which interim cash flows can be reinvested may be lower than that originally assumed.
- m) Settlement Risk: The inability of the Scheme to make intended securities purchases due to settlement problems could cause the Scheme to miss certain investment opportunities. By the same rationale, the inability to sell securities held in the Scheme's portfolio due to the extraneous factors that may impact liquidity would result at times, in potential losses to the Scheme, in case of a subsequent decline in the value of securities held in the Scheme's portfolio.
- n) Regulatory Risk: Changes in government policy in general and changes in tax benefits applicable to Mutual Funds may impact the returns to investors in the Scheme.
- o) The value of the Scheme's investments may be affected generally by factors affecting capital markets, such as interest rates, currency exchange rates, foreign investment, changes in government policy, taxation and political, economic or other

developments. Consequently, the net asset value of the Scheme may fluctuate and the value of the Scheme's Units may go down or up. Past performance of the Sponsor is not necessarily indicative of future performance of the Scheme.

- p) Money Market instruments are instruments that are generally have maturity of less than one year. The NAV of the Scheme's Units, will be affected by the changes in the level of interest rates.
- q) Investments in money market instruments and debt instruments involve credit risk commensurate with short term rating of the issuers.

## **2. Risk factors associated with Trading in Derivatives:**

Derivatives are high risk, high return instruments as they may be highly leveraged. A small price movement in the underlying security could have a large impact on their value and may also result in a loss.

Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.

The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.

The Fund may use derivative instruments like Interest Rate Swaps, Forward Rate Agreements or other derivative.

**Credit Risk:** The credit risk is the risk that the counter party will default on its obligations and is generally low, as there is no exchange of principal amounts in a derivative transaction.

**Illiquidity risk:** The risk that a derivative cannot be sold or purchased quickly enough at a fair price, due to lack of liquidity in the market.

**Market risk:** Derivatives carry the risk of adverse changes in the market price.

**Floating Leg Risk :** The fund pays the daily compounded rate. In practice however there can be a difference in the actual rate at which money is lent in the call market and the benchmark, which appears and is used.

In case of a received position in a call rate linked interest rate swaps (OIS), the fund pays the daily compounded rate. In practice however there can be a difference in the actual rate at which money is lent in the call market and the benchmark call rate, which is used in the swap calculations. The risk is to the extent that returns may be impacted to the investors in case of extreme movement in call rates.

It may be mentioned here that the guidelines issued by Reserve Bank of India from time to time for forward rate agreements and interest rate swaps and other derivative products would be adhered to.

## **3. Risk associated with Short Selling**

- Purchasing a security entails the risk of the security price going down. Short selling of securities (i.e. sale of securities without owning them) entails the risk of the security price going up there by decreasing the profitability of the short position. Short selling is subject to risks related to fluctuations in market price, and settlement/liquidity risks. If required by the Regulations, short selling may entail margin money to be deposited with the clearing house and daily mark to market of the prices and margins. This may impact fund pricing and may induce liquidity risks if the fund is not able to provide adequate margins to the clearing house. Failure to meet margin requirements may result in penalties being imposed by the exchanges and clearing house.
- Engaging in securities lending is subject to risks related to fluctuations in collateral value and settlement/liquidity and counter party risks. The risks in lending portfolio securities, as with other extensions of credit, consist of the failure of another party, in this case the approved intermediary, to comply with the terms of agreement entered into between the

lender of securities i.e. the scheme and the approved intermediary. Such failure to comply can result in the possible loss of rights in the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities deposited with the approved intermediary. The Mutual Fund may not be able to sell such lent securities and this can lead to temporary illiquidity and in turn cannot protect from the falling market price of the said security.

#### **4. Risks associated with Securities Lending and Borrowing (SLB)**

Securities Lending is lending of securities through an approved intermediary to a borrower under an agreement for a specified period with the condition that the borrower will return equivalent securities of the same type or class at the end of the specified period along with the corporate benefits accruing on the securities borrowed. The risks in security lending consist of the failure of intermediary / counterparty, to comply with the terms of agreement entered into between the lender of securities i.e. the scheme and the intermediary / counterparty. Such failure to comply can result in the possible loss of rights in the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities deposited with the approved intermediary. The scheme may not be able to sell lent out securities, which can lead to temporary illiquidity & loss of opportunity.

#### **5. Risk Factors specific to investments in Securitised and Structured Instruments: Underlying Risk**

##### **Underlying Risk:**

Each asset class has a different underlying risk, however, residential mortgages are supposed to be having lower default rates. On the other hand, repossession and subsequent recovery of commercial vehicles and other auto assets is fairly easier and better compared to mortgages. Some of the asset classes such as personal loans, credit card receivables etc., being unsecured credits in nature, may witness higher default rates. As regards corporate loans/receivables, depending upon the nature of the underlying security for the loan or the nature of the receivable the risks would correspondingly fluctuate. However, the credit enhancement stipulated by rating agencies for such asset class pools is typically much higher and hence their overall risks are comparable to other similarly rated asset classes.

##### **Limited Liquidity & Price Risk:**

Presently, secondary market for securitised papers is not very liquid. There is no assurance that a deep secondary market will develop for such securities. This could limit the ability of the investor to resell them. Even if a secondary market develops and sales were to take place, these secondary transactions may be at a discount to the initial issue price due to changes in the interest rate structure.

##### **Limited Recourse, Delinquency and Credit Risk:**

Securitised transactions are normally backed by pool of receivables and credit enhancement as stipulated by the rating agency, which differ from issue to issue. The Credit Enhancement stipulated represents a limited loss cover to the Investors. These Certificates represent an undivided beneficial interest in the underlying receivables and there is no obligation of either the Issuer or the Seller or the originator, or the parent or any affiliate of the Seller, Issuer and Originator. No financial recourse is available to the Certificate Holders against the Investors' Representative. Delinquencies and credit losses may cause depletion of the amount available under the Credit Enhancement and thereby the Investor Payouts may get affected if the amount available in the Credit Enhancement facility is not enough to cover the shortfall. On persistent default of a Obligor to repay his obligation, the Servicer may repossess and sell the underlying Asset.

However many factors may affect, delay or prevent the repossession of such Asset or the length of time required to realize the sale proceeds on such sales. In addition, the price at which such Asset may be sold may be lower than the amount due from that Obligor.

##### **Risks due to possible prepayments:**

Asset securitisation is a process whereby commercial or consumer credits are packaged and sold in the form of financial instruments.

Full prepayment of underlying loan contract may arise under any of the following circumstances:

- Obligor pays the Receivable due from him at any time prior to the scheduled maturity date of that Receivable; or
- Receivable is required to be repurchased by the Seller consequent to its inability to rectify a material misrepresentation with respect to that Receivable; or
- The Servicer recognizing a contract as a defaulted contract and hence repossessing the underlying Asset and selling the same.

In the event of prepayments, investors may be exposed to “reinvestment risk”.

#### **Bankruptcy of the Originator or Seller**

If originator becomes subject to bankruptcy proceedings and the court in the bankruptcy proceedings concludes that the sale from originator to Trust was not a sale then an Investor could experience losses or delays in the payments due. All possible care is generally taken in structuring the transaction so as to minimize the risk of the sale to Trust not being construed as a “True Sale”. Legal opinion is normally obtained to the effect that the assignment of Receivables to Trust in trust for and for the benefit of the Investors, as envisaged herein, would constitute a true sale.

#### **Bankruptcy of the Investor’s Agent**

If Investor’s agent, becomes subject to bankruptcy proceedings and the court in the bankruptcy proceedings concludes that the recourse of Investor’s Agent to the assets/receivables is not in its capacity as agent/ Trustee but in its personal capacity, then an Investor could experience losses or delays in the payments due under the swap agreement. All possible care is normally taken in structuring the transaction and drafting the underlying documents so as to provide that the assets/receivables if and when held by Investor’s Agent is held as agent and in Trust for the Investors and shall not form part of the personal assets of Investor’s Agent. Legal opinion is normally obtained to the effect that the Investors Agent’s recourse to assets/receivables is restricted in its capacity as agent and trustee and not in its personal capacity.

#### **Credit Rating of the Transaction/Certificate**

The credit rating is not a recommendation to purchase, hold or sell the Certificate in as much as the ratings do not comment on the market price of the Certificate or its suitability to a particular investor. There is no assurance by the rating agency either that the rating will remain at the same level for any given period of time or that the rating will not be lowered or withdrawn entirely by the rating agency.

#### **Risk of Co-mingling**

The Servicers normally deposit all payments received from the Obligors into the Collection Account. However, there could be a time gap between collection by a Servicer and depositing the same into the Collection account especially considering that some of the collections may be in the form of cash. In this interim period, collections from the Loan Agreements may not be segregated from other funds of the Servicer. If the Servicer fails to remit such funds due to Investors, the Investors may be exposed to a potential loss. Due care is normally taken to ensure that the Servicer enjoys highest credit rating on standalone basis to minimize Co-mingling risk.

#### **Investment exposure of the Fund with reference to Securitised Debt:**

The Fund will predominantly invest only in those securitization issuances which have AAA rating indicating the highest level of safety from credit risk point of view at the time of making an investment. The Fund will not invest in foreign securitised debt.

The Fund may invest in various type of securitisation issuances, including but not limited to Asset Backed Securitisation, Mortgage Backed Securitisation, Personal Loan Backed Securitisation, Collateralized Loan Obligation/Collateralized Bond Obligation and so on.

The Fund does not propose to limit its exposure to only one asset class or to have asset class based sub-limits as it will primarily look towards the AAA rating of the offering.

#### **6. Risk envisaged and mitigation measures for repo transactions :**

- **Counterparty Risks** - Risks could arise if the Counterparty does not return the security (in a borrowing transaction) as contracted or pay interest (lending transaction) on the due date. This risk is largely mitigated, as the choice of counterparties is 'restricted' and their credit ratings and overall credit risk levels are taken into account before entering into such transactions.
- **Settlement Risks** - Operational risks are lower as such trades are settled on a DVP (Delivery versus Payment – Safe settlement) basis. The trades are settled on a bilateral basis in the OTC segment.
- **Collateral / Credit Risk** - In the event of the scheme being unable to pay back the money to the Counterparty as contracted, the counter party may dispose of the assets (as they have sufficient margin) and the net proceeds if any after such disposal may be refunded to the scheme. The value of the collateral will be monitored on a daily basis and shortfalls if any will lead to demand on the counterparty to top up collateral. In ability to comply with top up requests could lead to liquidation of security / collateral and an early / premature termination of the agreement.

#### **7. Risk associated with Overseas Investment:**

- Subject to necessary approvals and within the investment objectives of the Scheme, the Scheme may invest in overseas markets which carry a risk on account of fluctuations in the foreign exchange rates, nature of securities market of the country, repatriation of capital due to exchange controls and political circumstances.
- It is the AMC's belief that investment in Permitted Foreign Securities offers new investment and portfolio diversification opportunities into multi-market and multi-currency products. However, such investments also entail additional risks. Such investment opportunities may be pursued by the AMC provided they are considered appropriate in terms of the overall investment objectives of the Scheme. Since the Scheme would invest in Permitted Foreign Securities including but not limited to units/ securities issued by overseas mutual fund or unit trusts which are registered with the overseas regulator, there may not be readily available and widely accepted benchmarks to measure performance of the Scheme. To manage risks associated with foreign currency and interest rate exposure, the Scheme may use derivatives in accordance with conditions as may be stipulated by SEBI/RBI from time to time.
- Offshore investments will be made subject to any/all approvals, conditions thereof as may be stipulated by SEBI/RBI and provided such investments do not result in expenses to the Scheme in excess of the ceiling on expenses prescribed by and consistent with costs and expenses attendant to international investing.
- To the extent that the assets of the Scheme will be invested in securities denominated in foreign currencies, the Indian Rupee equivalent of the net assets, distributions and income may be adversely affected by changes in the value of certain foreign currencies relative to the Indian Rupee. The repatriation of capital to India may also be hampered by changes in regulations concerning exchange controls or political circumstances as well as the application to it of other restrictions on investment. Due to time zone differences, NAV of investee scheme in such cases may not be available for the same day.
- The investment limit in foreign securities currently applicable to Mutual Fund under paragraph 12.19 of SEBI Master Circular for Mutual Funds dated May 19, 2023, if overall limit for the Mutual Fund in overseas securities reaches USD 1 billion or the overall limit for Mutual Fund Industry in overseas securities reaches USD 7 billion, then Mutual Fund will not be able to invest in overseas securities / will not be able to do incremental overseas investment, unless such limit is increased or further directions is received from SEBI or RBI in this regard. It may be noted that the cap of USD 1 billion will be monitored and enforced at the Mutual Fund level and not at the individual scheme level.

#### **8. Risks associated with segregated portfolio**

- Investor holding units of segregated portfolio may not be able to liquidate their holding till the time recovery of money from the issuer.
- Security comprising of segregated portfolio may not realise any value
- Listing of units of segregated portfolio in recognised stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV.

#### **9. Risks associated with investing in Tri-Party Repo through CCIL (TREPS)**

The mutual fund is a member of securities segment and Tri-party Repo trade settlement of the Clearing Corporation of India (CCIL). All transactions of the mutual fund in government securities and in Tri-party Repo trades are settled centrally through the infrastructure and settlement systems provided by CCIL; thus reducing the settlement and counterparty risks considerably for transactions in the said segments. CCIL maintains prefunded resources in all the clearing segments to cover potential losses arising from the default member. In the event of a clearing member failing to honour his settlement obligations, the default Fund is utilized to complete the settlement. The sequence in which the above resources are used is known as the “Default Waterfall”. As per the waterfall mechanism, after the defaulter’s margins and the defaulter’s contribution to the default fund have been appropriated, CCIL’s contribution is used to meet the losses. Post utilization of CCIL’s contribution if there is a residual loss, it is appropriated from the default fund contributions of the non-defaulting members. Thus the scheme is subject to risk of the initial margin and default fund contribution being invoked in the event of failure of any settlement obligations. In addition, the fund contribution is allowed to be used to meet the residual loss in case of default by the other clearing member (the defaulting member).

#### **10. Risk factors associated with processing of transaction through Stock Exchange Mechanism:**

The trading mechanism introduced by the stock exchange(s) is configured to accept and process transactions for mutual fund units in both Physical and Demat Form. The allotment and/or redemption of Units through NSE and/or BSE or any other recognised stock exchange(s), on any Business Day will depend upon the modalities of processing viz. collection of application form, order processing/settlement, etc. upon which the Fund has no control. Moreover, transactions conducted through the stock exchange mechanism shall be governed by the operating guidelines and directives issued by respective recognized stock exchange(s).

#### **11. Risk on Right to limit redemption:**

Subject to the approval of Board of Directors of the AMC and Trustee Company and immediate intimation to SEBI, a restriction on redemptions may be imposed by the Scheme under certain exceptional circumstances, which the AMC / Trustee believe that may lead to a systemic crisis or event that constrict liquidity of most securities or the efficient functioning of markets (subject to lock in period, if any). Please refer to the paragraph “Right to Limit Redemptions” for further details.

#### **12. Risks associated with investment in mutual fund units:**

Investment in units of Mutual Fund scheme involves investment risks such as, but not limited to, trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal. The value of units of mutual fund scheme may fluctuate based on the price / value / interest rates of the underlying securities in which the mutual fund scheme invests. The value of underlying securities may be affected, inter-alia, by changes in market environment, interest rates, changes in credit rating, trading volumes, settlement periods and transfer procedures. The NAV is also exposed to price/interest rate risk and credit risk and may be affected inter-alia, by the counterparty’s ability or willingness to meet its contractual obligations, government policy, volatility and liquidity in the money markets and pressure on the exchange rate of the rupee. Investment in units of mutual fund scheme is also exposed to risk of suspension of subscriptions / redemptions of the units, change in fundamental attributes etc. Since the Scheme may invest in schemes of Mutual Funds, scheme specific risk factors of each such mutual fund scheme will be applicable to the Scheme portfolio.

### C. Risk mitigation Strategies

The Fund by utilizing a holistic risk management strategy will endeavor to manage risks associated with investing in debt markets. The risk control process involves identifying & measuring the risk through various risk measurement tools.

The Fund has identified following risks of investing in debt and designed risk management strategies, which are embedded in the investment process to manage such risks.

Nature of Risk	Risk Mitigation Measures by AMC
<b>For making investment in fixed income and money markets</b>	
<p><b>Credit Risk:</b> Debt securities are subject to the risk of an issuer's inability to meet principal and interest payments on the obligations.</p>	<p>The fund has a rigorous credit research process. The credit team analyses and approves each issuer before investment by the schemes. There is a regulatory and internal cap on exposure to each issuer. This ensures a diversified portfolio and reduced credit risk in the portfolio.</p>
<p><b>Liquidity Risk:</b> The corporate debt market is relatively illiquid vis-à-vis the government securities market. Even though the government securities market is more liquid compared to that of other debt instruments, on occasions, there could be difficulties in transacting in the market due to extreme volatility or unusual constriction in market volumes or on occasions when an unusually large transaction has to be put through.</p>	<p>The scheme is envisaged to be actively managed portfolios. The liquidity and volatility of a security are important criteria in security selection process. This ensures that liquidity risk is minimized.</p>
<p><b>Investing in unrated securities:</b> Lower rated or unrated securities are more likely to react to developments affecting the market and the credit risk than the highly rated securities which react primarily to movements in the general level of interest rates. Lower rated securities also tend to be more sensitive to economic conditions than higher rated securities.</p>	<p>The scheme has a rigorous credit research process and as such all investments, rated or unrated, are analyzed and approved by the credit team before investment by the schemes. Further there is a regulatory and internal cap on exposure to unrated issuers, limiting exposure to unrated securities.</p>
<p><b>Investing in unlisted securities:</b> The Schemes may invest in securities which are not quoted on a stock exchange ("unlisted securities") which in general are subject to greater price fluctuations, less liquidity and greater risk than those which are traded in the open market. Unlisted securities may lack a liquid secondary market and there can be no assurance that the Schemes will realise its investments in unlisted securities at a fair value.</p>	<p>The schemes will predominantly invest in listed securities and in some instances, invest in securities which are expected to be listed. Further, listing of debt securities typically has no significant impact on the liquidity, trading volatility and price discovery.</p>
<p><b>Settlement Risk:</b> Delays or other problems in settlement of transactions could result in temporary periods when the assets of the Scheme are not invested and no return is earned thereon.</p>	<p>The AMC has well laid out processes and systems, which mitigate operational risks attached with the settlement process.</p>
<p><b>Reinvestment Risk:</b> This risk refers to the interest rate levels at which cash flows received from the securities in the Plans are</p>	<p>Reinvestment risk is an inherent feature of the portfolio management process. It may be</p>

reinvested. The additional income from reinvestment is the “interest on interest” component. The risk is that the rate at which interim cash flows can be reinvested may be lower than that originally assumed.	managed, to a certain extent, by seeking to invest in securities with relatively low intermittent cash flows.

**Risk Management and Liquidity Management tools:**

Liquidity Risk Management of Open ended Debt Schemes is managed using various tools which can be identified as Stress Testing, Liquidity Risk considering Investor behaviour and Asset Liability Mismatch Stress tests (using methods provided by AMFI) monitor the Annualised impact on NAV while considering rise in yields for a given credit rating, type of security, etc, in respective matrices for the relevant duration bucket whereas the investor behaviour and redemption trends are monitored in accordance with the percentage of liquid assets in a portfolio while monitoring the Asset Liability mismatch.

**An indicative list of liquidity management tools is as under:**

Liquidity Management Tool	Brief Description
<b>Potential Risk Matrix</b>	As provided paragraph 17.5 of SEBI Master Circular dated May 19, 2023, on Potential Risk Class Matrix (PRC) for debt schemes and various other circulars issued thereon, the scheme shall maintain its portfolio in line with the defined PRC position i.e maximum risk that a scheme will run as per design and a measurement of that risk on a regular basis in case of any breaches, remedial actions shall be in line with the requirement of the aforesaid circular.
<b>Risk -o- meter</b>	As provided in paragraph 17.4 of SEBI Master Circular dated May 19, 2023 on Product Labelling in mutual Fund schemes, Risk-o-meter and various other circulars issue thereon, the scheme shall calculate and disclose the current risk level based on its portfolio construct.
<b>Liquidity Risk Management (LRM)</b>	As provided in AMFI Best Practice Guidelines circular dated July 24, 2021 on Prudential norms for Liquidity Risk Management for Open ended Debt schemes (except Overnight Fund, Gilt Fund and Gilt Fund with 10-year constant duration) and various other circulars issued thereon, defines liquidity risk (Liquidity Ratio-Redemption at Risk (LRaR) and Liquidity Ratio- Conditional Redemption at Risk (LR-CRaR) arising from the liability side of the scheme and shall maintain these on each day of eligible assets by the scheme. However, to meet redemptions, the scheme may have to periodically dip into their liquid assets which may result in the liquidity ratio dropping below the required levels on those days. The scheme shall ensure to take remedial actions in line with the requirements of the aforementioned circular.  Also, back testing analysis is performed which involves capturing actual outflow for each scheme and comparing the same with minimum LRaR and LCRaR required to be maintained by the scheme.
<b>Stress Testing Circular</b>	Stress Testing of Interest Rate, Credit and Liquidity Risk at an aggregate portfolio level in terms of its impact on NAV is performed in line with AMFI Best practice circular dated October 12, 2022 and various other circular issued thereon.
<b>Risk Management Framework</b>	As provided in Risk Management Framework circular, the schemes calculates ALM requirement which addresses potential liquidity requirement over a 90-da period and maintains relevant asset side liquidity. Remedial actions, if any required to be taken are based on directions of the Investment Committee.

## II. Information about the scheme:

### A. Where will the scheme invest –

Subject to the Regulations and other prevailing laws as applicable, the corpus of the Scheme can be invested in any (but not exclusively) of the following securities:

The securities may be acquired from primary market/ initial public offer, secondary market operations, private placement or negotiated deals.

### Overseas Investments by the Scheme:

According to paragraph 12.19 of SEBI Master Circular for Mutual Funds dated May 19, 2023, mutual funds can invest in certain permissible foreign securities.

As per paragraph 12.19.1 of SEBI Master Circular for Mutual Funds dated May 19, 2023 such investments are subject to an overall limit of US\$ 7 billion for all mutual funds put together. The Mutual Funds have been allowed an individual limit of US\$ 1 billion for overseas investments. The Scheme may, with the approval of SEBI/ RBI invest in foreign securities as specified by SEBI. The overall ceiling for investment in overseas ETFs that invest in securities is US \$ 1 billion subject to a maximum of US \$ 300 million per mutual fund.

The AMC is allowed to invest in overseas securities upto 20% of the average Asset Under Management ('AUM') in overseas securities of the previous three calendar months subject to maximum limit of USD 1billion per Mutual Fund. The above limits shall be considered as soft limits for the purpose of reporting only by Mutual Funds on monthly basis as per paragraph 12.19.1.3(d) of SEBI Master Circular for Mutual Funds dated May 19, 2023.

The Mutual Fund may, where necessary will appoint intermediaries as sub-managers, sub-custodians, etc. for managing and administering such investments. The appointment of such intermediaries shall be in accordance with the applicable requirements of SEBI and within the permissible ceilings of expenses.

### Position of Debt Market in India

The Indian debt market, one of the largest in Asia, is developing rapidly buoyed by a multitude of factors including new instruments, increased liquidity, deregulation of interest rates and improved settlement systems. The major players in the Indian debt markets today are banks, financial institutions, insurance companies, pension funds, provident funds and mutual funds. The instruments in the market can be broadly categorized as those issued by corporates, banks, financial institutions and those issued by state/central governments. The risks associated with any investments are - credit risk, interest rate risk and liquidity risk. While corporate papers carry credit risk due to changing business conditions, government securities do not have credit risk as they are sovereign in nature. Interest rate risk is present in all debt securities and depends on a variety of macroeconomic factors. The largest segment of the Indian Debt market consists of the Government of India securities where the daily average trading volume is in excess of Rs. 40,000 crores, with instrument tenors ranging from short dated Treasury Bills to long dated securities extending upto 50 years. The Corporate bond market, though relatively less liquid, is also fast developing with an increased participation from the banks, financial institutions, mutual funds, provident funds, insurance companies and corporate treasuries. Public Financial Institutions, Public Sector Undertakings and Private AAA Corporates are the major issuers. Corporate bonds majorly are issued as fixed rate bonds. The yield curve usually tends to be positive sloping i.e. yield of shorter dated securities being lower than that of longer dated ones.

The money markets in India essentially consist of call money market (i.e. market for overnight and term money between banks and institutions), repo transactions (temporary sale with an agreement to buy back the securities at a future date at specified price), Tri-Party Repo, commercial papers (CPs, short term unsecured promissory note, generally issued by corporates), certificate of deposits (CDs, issued by banks) and Treasury Bills (issued by RBI). A predominantly institutional market, the key money market players are banks, financial institutions, insurance companies, mutual funds, primary dealers and corporates.

The various instruments currently available for investments are:

Issuer	Instrument	Maturity	Yields (%) as on May 31, 2024	Liquidity
GOI	Treasury Bill	91 days	6.76%	High
GOI	Treasury Bill	364 days	7.05%	High
GOI	Short Dated	1-3 Years	7.10% - 7.26%	High
GOI	Medium Dated	3-5 Years	7.22% - 7.26%	High
GOI	Long Dated	5-10 Years	7.20% - 7.26%	High
Corporate	Taxable Bonds (AAA)	1-3 Years	7.55% - 7.70%	Medium
Corporate	Taxable Bonds (AAA)	3-5 Years	7.62% - 7.70%	Low to medium
Corporate	CPs (A1+)	3 months	7.00%-7.10 %	Medium to High
Corporate	CPs (A1+)	1 Year	7.50% -7.65%	Medium

The actual yields will, however, vary in line with general levels of interest rates and debt/money market conditions prevailing from time to time.

## **B. What are the investment restrictions?**

Pursuant to Regulations, specifically the Seventh Schedule and amendments thereto, the following investment restrictions are currently applicable to the Scheme:

- The Scheme shall not invest more than 10% of its net assets in debt instruments comprising money market & non money market instruments issued by a single issuer, which are rated not below investment grade by a credit rating agency authorized to carry out such activity under the SEBI Act. Such investment limit may be extended to 12% of the net assets of the Scheme with the prior approval of the Trustees and the Board of the AMC. Such limit shall not be applicable for investments in government securities, treasury bills & Tri-Party Repo. Provided further that investment within such limit can be made in mortgage backed securitised debts which are rated not below investment grade by a credit rating agency registered with SEBI. Provided further that such limit shall not be applicable for investments in case of debt exchange traded funds or such other funds as may be specified by the Board from time to time.

A mutual fund scheme shall not invest more than:

- a) 10% of its NAV in debt and money market securities rated AAA; or
- b) 8% of its NAV in debt and money market securities rated AA; or
- c) 6% of its NAV in debt and money market securities rated A and below issued by a single issuer.

The above investment limits may be extended by up to 2% of the NAV of the scheme with prior approval of the Board of Trustees and Board of Directors of the AMC, subject to compliance with the overall 12% limit specified in Clause 1 of Seventh Schedule of MF Regulation.

Such limit shall not be applicable for investments in government securities, treasury bills & Tri-Party Repos on Government Securities or TREPS. Provided further that investment within such limit can be made in mortgage backed Securitised debts which are rated not below investment grade by a credit rating agency registered with SEBI. Provided further that such limit shall not be applicable for investments in case of debt exchange traded funds or such other funds as may be specified by the Board from time to time.

- The Scheme shall not invest in unlisted debt instruments including commercial papers, except Government Securities and other money market instruments: Provided that the Scheme may invest in unlisted non-convertible debentures up to a maximum of 10% of the debt portfolio of the scheme subject to such conditions as may be specified by SEBI from time to time:

Provided further that the Schemes shall comply with the norms under this clause within the time and in the manner as may be specified by SEBI:

Provided further that the norms for investments by the scheme in unrated debt instruments shall be specified by SEBI from time to time.

Note:

The Fund may raise such borrowings, secured or unsecured, from any person or entity as it may deem fit, including Sponsor or Shareholders of any of their associate / group / affiliate entities or banks, after approval by the Trustee, at market related rates.

If the Mutual Fund holds an aggregate of securities which are worth Rs.10 Crores or more, as on the latest balance sheet date, it shall, subject to such instructions as may be issued from time to time by the Board of the AMC, settle its transactions only through dematerialized Securities. Further all transactions in government securities shall be in dematerialised form.

- In term of SEBI Circular Date March 10, 2021, no Mutual Fund under all its schemes shall own more than 10% of debt instruments with special features or Tier 1 bonds and Tier 2 bonds issued under Basel III framework with special features issued by a single issuer. Further, the scheme shall not invest more than 10% of its NAV of the debt portfolio of the scheme in such instruments; and shall not invest more than 5% of its NAV of the debt portfolio of the scheme in such instruments issued by a single issuer.

#### **Participation of Schemes of PGIM India Mutual Fund in Repos of Corporate debt securities**

In accordance with paragraph 12.18 of SEBI Master Circular dated May 19, 2023, schemes of the Mutual Fund shall participate in the 'Corporate Bond Repo' transactions as per guidelines issued by Reserve Bank of India (RBI) from time to time. Currently the applicable guidelines are as under:

- a. Gross exposure of the scheme to repo transactions in corporate debt securities shall not be more than 10 % of the net assets of the concerned scheme.
- b. The cumulative gross exposure through repo transactions in corporate debt securities along with debt and derivatives shall not exceed 100% of the net assets of the concerned scheme.
- c. Mutual Funds shall participate in repo transactions only in 'AA and above' rated corporate debt securities.
- d. In terms of Regulation 44 (2) mutual funds shall borrow through repo transactions only if the tenor of the transaction does not exceed a period of six months

The investment restrictions applicable to the Scheme's participation in the Corporate Bond repos will also be as prescribed or varied by SEBI or by the Board of PGIM India Trustees Pvt. Ltd. (subject to SEBI requirements) from time to time.

The following guidelines shall be followed by PGIM India Mutual Fund for participating in repo in Corporate debt securities, which have been approved by the Board of AMC and Trustee Company:

#### **a) Category of Counterparty to be considered for making investment:**

All entities eligible for transacting in Corporate Bond repos as defined by SEBI and RBI shall be considered for repo transactions.

**b) Credit rating of Counterparty to be considered for making investment:**

The scheme shall participate in Corporate Bond repo transactions with counterparties having a minimum investment grade rating and approved by the Investment Committee on a case-to-case basis. In case a Counterparty is unrated, the Investment Committee will decide/ assign a rating to the Counterparty and report the same to the Board.

**c) Tenor of Repo and Collateral:**

As a repo seller (borrowing), the scheme will borrow cash for a period not exceeding 6 months or as per extant regulations. As a repo buyer, the Scheme are allowed to undertake the transactions (lending) for maximum maturity upto one year or such other terms as may be approved by the Investment Committee. There shall be no restriction / limitation on the tenor of the underlying collateral that is being accepted.

**d) Applicable haircuts:**

As per RBI circular RBI/2012-13/365 IDMD.PCD. 09 /14.03.02/2012-13 dated 07/01/2013, all Corporate Bond repo transaction will be subject to a minimum haircut given as given below:

- a. AAA: 7.50%
- b. AA+ : 8.50%
- c. AA : 10.00%

The haircut will be applicable on the prevailing market value of the said security on the prevailing date of trade. However, the fund manager may ask for a higher haircut (while lending) or give a higher haircut (while borrowing) depending on the prevailing market and liquidity situation.

All investment restrictions shall be applicable at the time of making investment. The AMC/Trustee may alter these above stated restrictions from time to time to the extent the Regulations change, so as to permit the Scheme to make its investments in the full spectrum of permitted investments for mutual funds to achieve its respective investment objective.

**C. Fundamental Attributes**

Following are the Fundamental Attributes of the Scheme, in terms of Clause 1.14 of SEBI Master Circular for Mutual Funds dated May 19, 2023:

**i. Type of scheme:**

An open ended debt scheme investing in government securities across maturities. A relatively high interest rate risk and relatively low credit risk scheme.

**Right to Limit Redemption:-**

The AMC may, under the below mentioned circumstances, impose restriction on redemption (including switch-outs) for a period not exceeding 10 working days in any 90 days period. Such restriction may be imposed when there are circumstances leading to a systemic crisis or event that severely constricts market liquidity or the efficient functioning of markets such as:

- Liquidity issues - When market at large becomes illiquid affecting almost all securities rather than any issuer specific security;
- Market failures, exchange closures - When markets are affected by unexpected events which impact the functioning of exchanges or the regular course of transactions. Such unexpected events could also be related to political, economic, military, monetary or other emergencies;
- Operational issues - When exceptional circumstances are caused by force majeure, unpredictable operational problems and technical failures (e.g. a black out).

	<p>However, such restriction would not be applicable to the redemption (including switch-outs) requests received for up to INR 2 Lakhs. In case of redemption (including switch-outs) requests above INR 2 Lakhs, the AMC shall redeem the first INR 2 Lakhs without such restriction and remaining part over and above INR 2 Lakhs shall be subject to such restriction.</p> <p>Any imposition of restriction on redemption (including switch-outs) of units of the Scheme shall be made applicable only after specific approval of Board of AMC and Trustee and the same shall also be informed to SEBI immediately.</p>
