Under normal circumstances, the AMC shall endeavor that the Tracking Error of the Scheme shall not exceed 2%. For the Fund the annualized tracking difference averaged over one year period shall not exceed 1.25%. There can be no assurance or guarantee that the Scheme will achieve any particular level of Tracking Error relative to performance of the underlying Index.</p> <p>Portfolio Rebalancing In the event that the asset allocation of the Scheme should deviate from the ranges as noted in the asset allocation table above, then the Fund Manager will rebalance the portfolio of the Scheme to the position indicated in the asset allocation table above within a period of 7 calendar days. However, in case of deviation in the asset allocation beyond 7 days, the justification for the same shall be provided by the Fund Manager of the Scheme to the Investment Committee and the reason for the same shall be recorded in writing.</p> <p>It may be noted that no prior intimation/indication will be given to investors when the composition/asset allocation pattern under the Scheme undergoes changes within the permitted band as indicated above.</p> <p>In line with Paragraph 3.5.3.11 of SEBI Master Circular dated May 19, 2023, in case of change in constituents of the index due to periodic review, the portfolio of the Scheme shall be rebalanced within 7 calendar days.</p> <p>Further, any transactions undertaken in the portfolio of the Scheme in order to meet the redemption and subscription obligations shall be done while ensuring that post such transactions replication of the portfolio with the index is maintained at all points of time.</p>			
Investment Strategy	<p>The scheme will invest in the constituents of the underlying index viz. CRISIL-IBX Gilt Index - April 2028, and will use a passive investment approach to manage the portfolio, subject to tracking error. Passive investment means the scheme will invest in the securities included in its underlying index regardless of their investment merit. The underlying investments may be affected by a general decline in the Indian markets relating to its Underlying Index and the AMC does not attempt to take defensive positions during such declining markets. Further, the fund manager does not make any judgment about the investment merit nor shall attempt to apply any economic, financial or market analysis.</p>			

	<p>The fund manager’s endeavor would be to rebalance the portfolio in order to replicate the underlying index. However, there may be a short period where the constituents of the portfolio may differ from that of the underlying index. In case of any deviation from the asset allocation pattern, the portfolio to be rebalanced by AMC within 7 days from the date of said deviation.</p>
<p>Risk Profile of the Scheme</p>	<p>Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme specific Risk Factors are summarized below:</p> <ol style="list-style-type: none"> 1. Passively Managed Portfolio: As the scheme proposes to invest not less than 95% of the net assets in the securities of the underlying Index, the scheme will not be actively managed. As PGIM India CRISIL IBX Gilt Index – Apr 2028 Fund is not actively managed, the scheme invests in the securities included in its underlying index regardless of their investment merit. The underlying investments may be affected by a general decline in the Indian markets relating to its Underlying Index and the AMC does not attempt to take defensive positions during such declining markets. Further, the fund manager does not make any judgment about the investment merit nor shall attempt to apply any economic, financial or market analysis. 2. The liquidity of the Scheme’s investments may be inherently restricted by trading volumes, settlement periods and transfer procedures. In the event of an inordinately large number of redemption requests, or of a re-structuring of the Scheme’s investment portfolio, these periods may become significant. 3. Tracking error risk <p>Tracking error is defined as the annualized standard deviation of the difference in daily returns between the NAV of the Scheme and the Underlying Index. Theoretically, the corpus of the Scheme has to be fully invested in the securities comprising the Underlying Index in the same proportion of weights as the securities have in the Underlying Index. However, deviations from the stated index replication may occur due to reason that the Scheme has to incur expenses, corporate actions pertaining to the Index including changes to the constituents, regulatory policies, ability of the Fund Manager to replicate the Underlying Index, delay in purchase or non-availability of underlying securities forming part of the index etc. The AMC would monitor the tracking error of the Scheme on an ongoing basis and would seek to minimize tracking error to the extent possible. There can be no assurance or guarantee that the Scheme will achieve any particular level of tracking error relative to performance of the Index.</p> <p>It will be the endeavor of the fund manager to keep the tracking error as low as possible. Under normal circumstances, such tracking error is not expected to exceed 2%. However, in certain events like market volatility during rebalancing of the portfolio following the rebalancing of the underlying index, etc. or in abnormal market circumstances, the tracking error may exceed the above limits. In case of unavoidable circumstances in the nature of force majeure, which are beyond the control of the AMCs, the tracking error may exceed 2% and the same shall be brought to the notice of Trustees with corrective actions taken by the AMC, if any.</p> 4. Tracking Difference Risk <p>The Fund Manager may not be able to invest the entire corpus exactly in the same proportion as in the underlying index due to certain factors such as the fees and expenses of the scheme, corporate actions, cash balance, changes to the underlying index and regulatory policies which may affect AMC’s ability to achieve close correlation with the underlying index of the scheme. The scheme’s returns may therefore deviate from those of its underlying index. Tracking Difference is the Difference of daily returns between the Scheme and the Benchmark Index annualized over 1 year, 3 Year, 5 Year, 10 year and Scheme Since Inception period. It will be the endeavor of the fund manager to keep the tracking difference as low as possible. The Fund must maintain an annualized Tracking Difference averaged over one year period of not more than 1.25%. If the tracking difference averaged over one year period is higher than 1.25%, the same shall be brought to the notice of trustees with corrective actions taken by the AMC, if any. Tracking difference will be disclosed on a monthly basis on www.pgimindiamf.com and AMFI website.</p>
