	<p>placed before the Investment Committee and reasons for the same shall be recorded in writing. However, at all times, the portfolio will adhere to the overall investment objective of the scheme.</p> <p>In case the portfolio of schemes is not rebalanced within the aforementioned mandated plus extended timelines, AMCs shall:</p> <ul style="list-style-type: none"> i. not be permitted to launch any new scheme till the time the portfolio is rebalanced. ii. not to levy exit load, if any, on the investors exiting such scheme(s) <p><u>Short term defensive consideration:</u></p> <p>Due to market conditions, the AMC may invest beyond the range set out in the asset allocation. Such deviations shall normally be for a short term and defensive considerations in line with paragraph 1.14.1.2(b) of SEBI Master Circular for Mutual Funds dated June 27, 2024 and the fund manager will rebalance the portfolio within 30 calendar days from the date of deviation.</p>
<p>Investment Strategy</p>	<p>The investment objective of the Scheme is to generate long term capital appreciation by actively investing in equity and equity related securities of large cap, mid cap and small cap companies.</p> <p>The Scheme will maintain a minimum exposure of 25% of its total assets in each market cap category viz. Large cap, Mid cap & Small cap. The Scheme may also invest upto 25% of its total assets in debt and money market securities.</p> <p>Currently the large cap companies are the 1st-100th, mid cap companies are 101st - 250th and small cap companies are 251st company onwards in terms of full market capitalisation. The list of stocks would be as per the list published by AMFI in accordance with the said circular and updated on half yearly basis.</p> <p>The portfolio will be built utilizing a combination of the top-down and bottom-up portfolio construction process, focusing on the fundamentals of each stock, including quality of management. The fund manager will aim to build a diversified portfolio with exposure across sectors.</p> <p>The Scheme may also invest a certain portion of its corpus in debt and money market securities. Investment in debt securities will be guided by credit quality, liquidity, interest rates and their outlook. The Scheme may invest in other scheme(s) managed by the AMC or in the scheme(s) of any other mutual fund, provided it is in conformity with the investment objectives of the Scheme and in terms of the prevailing Regulations.</p> <p><u>Derivatives</u></p> <p>The Scheme may invest in various derivative instruments which are permissible under the applicable regulations. Such investments shall be subject to the investment objective and strategy of the Scheme and the internal limits if any, as laid down from time to time. These include but are not limited to futures (both stock and index) and options (stock and index). Derivatives are financial contracts of pre-determined fixed duration, whose values are derived from the value of an underlying primary financial instrument such as interest rates, exchange rates, commodities and equities. There are several advantages in using derivatives in the portfolio. The use of derivatives provides flexibility to the Scheme to hedge whole or part of the portfolio.</p>

The risks associated with derivatives are similar to those associated with underlying investments. The additional risks of using derivative strategies could be on account of:

- Illiquidity;
- Potential mispricing of the Futures/Options;
- Lack of opportunity;
- Inability of derivatives to correlate perfectly with the underlying (Indices, Assets, Exchange Rates);
- Cost of hedge can be higher than adverse impact of market movements;
- An exposure to derivatives in excess of the hedging requirements can lead to losses;
- An exposure to derivatives can also limit the profits from a genuine investment transaction.
- The prices which are seen on the screen need not be the same at which execution will take place.

For detailed risks associated with use of derivatives, please refer paragraph “Scheme Specific Risk Factors”

For further details regarding concepts and examples of derivatives that may be used by the fund manager, please refer to SAI.

Securitisation

Asset securitisation is a process whereby commercial or consumer credits are packaged and sold in the form of financial instruments. A typical process of asset securitisation involves sale of specific Receivables to a Special Purpose Vehicle (SPV) set up in the form of a trust or a company. The SPV in turn issues financial instruments (e.g., promissory notes, pass through certificates or other debt instruments) to investors, such instruments evidencing the beneficial ownership of the investors in the Receivables. The financial instruments are rated by an independent credit rating agency. An Investor’s Agent is normally appointed for providing trusteeship services for the transaction.

On the recommendation of the credit rating agency, additional credit support (Credit Enhancement) may be provided in order that the instrument may receive the desired level of rating. Typically the servicing of the Receivables is continued by the seller in the capacity of the Servicer. Cash flows, as and when they are received, are passed onto the investors.

Risk Control

Since investing requires disciplined risk management, the AMC would incorporate adequate safeguards for controlling risks in the portfolio construction process.

The risk control process involves reducing risks through portfolio diversification, taking care however not to dilute returns in the process. The AMC believes that this diversification would help achieve the desired level of consistency in returns. Stock specific risk will be minimized by investing only in those companies that have been analyzed by the Investment Team at the AMC. For investments in debt securities, the AMC aims to identify securities, which offer superior levels of yield at lower levels of risks. With the aim of controlling risks, rigorous and in-depth credit evaluation of the securities proposed to be invested in, will be carried out by the investment team of the AMC. Rated Debt instruments in which the Scheme invests will be of investment grade as rated by a credit rating agency. The AMC will be guided but not limited by the ratings of Rating Agencies such as CRISIL, CARE, ICRA and Fitch or any other rating agencies that may be registered with SEBI from time to time. In case a debt instrument is not rated, investment will be in accordance with Guidelines approved by the Board. Further, all investments in the unrated paper are

	<p>periodically reviewed by Investment Committee and the Board of AMC & Trustee Company.</p> <p>The Scheme may also use various derivatives and hedging products from time to time, as would be available and permitted by SEBI, in an attempt to protect the value of the portfolio and enhance Unitholders' interest.</p> <p><u>Portfolio Turnover</u></p> <p>The Scheme is an open-ended scheme. It is expected that there would be a number of subscriptions and redemptions on a daily basis. Consequently, it is difficult to estimate with any reasonable measure of accuracy, the likely turnover in the portfolio.</p>
<p>Risk Profile of the Scheme</p>	<p>Mutual Fund Units involve investment risks including the possible loss of principal. Investment in the scheme will involve certain Scheme specific Risk Factors which are summarized below:</p> <ul style="list-style-type: none"> • The scheme seeks to invest minimum of 25% of its total assets in each market cap category i.e. large, mid and small market cap at all points in time. Investment in mid cap and small cap stocks are based on the premise that these stocks have the ability to increase their earnings at a faster pace as compared to large cap stocks and grow into larger, more valuable companies. However, it is important to note that mid cap and small cap stocks can be riskier and more volatile on a relative basis. It should be noted that over a period of time, small cap, mid cap and large cap stocks have demonstrated different levels of volatility and investment returns and it is important to note that generally, no one class consistently outperforms the others. • The Schemes carries risk associated with investing in equity market, which may be volatile and hence prone to price fluctuation on a daily basis. Investment in equities involves a high degree of risk and investors with low risk appetite should not invest in the equity oriented schemes, as there is a risk of losing their investment. • The Scheme carries risk associated with investing in debt and money market instruments. Investment in debt and money market instruments are subject to Interest Rate Risk, Credit Risk, Spread Risk, Liquidity Risk, Counterparty, Risk and Re-investment Risk. As the price / value / interest rates of the securities in which the Scheme invests fluctuate, the value of your investment in the Scheme may go up or down. <p>For details of risk factors and risk mitigation measures, please refer SID.</p>
<p>Plans/Options</p>	<p>The Scheme shall offer two plans viz. Regular Plan and Direct Plan.</p> <p>Direct Plan is only for investors who purchase /subscribe Units in the Scheme directly with the Fund and is not available for investors who route their investments through a Distributor and is offered in accordance with paragraph 2.5 of SEBI Master Circular for Mutual Funds dated June 27, 2024.</p> <p>Each Plan has two Options, viz., Growth Option and Income Distribution cum Capital Withdrawal (IDCW) Option. As per PMLA guidelines and relevant SEBI circulars issued from time to time, non-individuals and trusts are required to provide details of controlling persons [CP] / ultimate beneficiary owner [UBO] and submit appropriate proof of identity of such CPs/ UBOs. The beneficial owner has been defined in the circular as the natural person or persons, who ultimately own, control or influence a client and/or persons on whose behalf a transaction is being conducted and includes a person who exercises ultimate effective control over a legal person or arrangement.

A. For Investors other than individuals or trusts:
